Summary

Highly motivated Frontend Software Engineer with 3 years of experience specializing in Angular development. Proven ability to contribute to complex engineering initiatives, including a microfrontend proof-of-concept and style library decoupling. Experienced in using React and Next.js for personal projects, demonstrating a strong commitment to continuous learning.

Experience

Seven Bridges/Velsera

March 2022 - Current

Associate Software Engineer

Belgrade, Serbia

- My responsibilities included enhancing the functionality of several Angular applications.
- Develop and maintain existing code within the legacy stack, which included Backbone.js and Marionette.js
- Active participation in various engineering initiatives, such as the migration to a microfrontend architecture and styles library decoupling.

Seven Bridges

October 2021 - December 2021

Javascript Developer Intern

Belgrade, Serbia

- Gained initial experience in Angular development.
- Under the guidance of experienced mentors and in collaboration with fellow interns, our primary task was to develop an internal platform for database access requests.
- The project involved initial prototyping and design in Figma, followed by full-stack development in Angular.

Education

School of Computing

October 2018 - October 2023

Computer Science

BSc.

Grammar school Kruševac

September 2014 - May 2018

Natural Sciences & Mathematics

High school

Skills

Web Technologies

Advanced

Angular, Typescript, Javascript, HTML5, CSS3
